

STUDIO ACCESSIBILITY

Main Entrance

Entrance to the studio is through an on-street entrance door measuring 195cm x 71cm.

There is a 14-step stairway to the studio internal entrance. The stair corridor has a width of 76cm. There is a small recess on both sides of the wall to use as support during ascent and descent instead of a handrail. The door at the base of the stairway is 195cm x 71cm.

Fire Exit

The fire exit entrance is located through a on-street metal gate and down a steeper set of stairs onto a small patio. There is a 13-step stairway with a handrail for support. The fire exit door measures 195 cm x 72cm.

For larger objects, we recommend using the fire entrance as there is more width and greater turning angles for getting through the doorway. Large objects can be lifted down the stairway. Please note, prior scheduling is required.
